

Win Moe Oo (Jack)

(+65) 88204840 | winmoeoo.personal@gmail.com | www.linkedin.com/in/winmoeoo

CAREER OBJECTIVE

Polytechnic student with over 3 years of full-stack development experience. Skilled in React.js, Node.js, Express, and PostgreSQL, with a focus on scalable, responsive, and user-centered web applications. Aspiring to contribute technical expertise as a full-stack development intern.

EDUCATION

Diploma in Information Technology, Singapore Polytechnic, Singapore

Apr 2023 - Apr 2026

- As and Distinctions in: Fundamentals of Programming (FOP), Java Application Development, and Java Programming.

PROFESSIONAL EXPERIENCE

Software Development Intern at Realistic Infographics Group (RIG), Yangon

Dec 2022 – Feb 2023

- Applied Agile methodologies during sprint reviews and collaborated with the team on development workflows.
- Contributed to front-end development tasks, performed bug testing, and assisted in debugging a Real Estate Listing application prototype.
- Gained hands-on experience across the full *Software Development Life Cycle (SDLC)* in a fast-paced professional environment.

PROJECTS

Digital Portfolio

Up to Date

- Developed a personal portfolio using *Vite*, *Tailwind CSS*, and *React.js* to showcase projects.
- Deployed the application on *Vercel* for fast, serverless hosting with plans for future backend integration and feature expansion.

IMCS Consultancy Web Application (Version 2)

Sep 2025

- Led development of a full-stack app using *Vite*, *Tailwind CSS*, *React (frontend)*, *Node.js/Express (backend)*, and *Neon DB PostgreSQL*, deployed on *AWS*.
- Configured CI/CD pipelines, automated testing with *Playwright*, and handled collaborative *GitHub* workflows for deployment.
- Worked closely with the team to integrate a *Retrieval-Augmented Generation (RAG)* feature and debugged complex logic errors.
- Major Contributor of AI features in this version switching from manual vector embeddings and API calls to *AWS managed Bedrock* and *Opensearch* for various AI autofill and context based chatbox.

AuthINC Project

Apr 2023 - Sep 2023

- Developed a full-stack multi-tenant site management web app with role-based access control, asset management, and *JWT* authentication.
- Implemented user-agent tracking for device monitoring and enforced security best practices.
- Integrated *Cloudinary* for asset storage, managed *RESTful APIs*, and performed *CRUD* operations with *PostgresQL* and *Node.js*.

COMPETITIONS & CHALLENGES

SimplifyNext UiPath Community Hackathon

Apr 2024

- Gained hands-on experience and broadened understanding of *Robotic Process Automation (RPA)* within the IT landscape.

SUTD X ESSEC Create4Good Hackathon

Mar 2024

- Collaborated with cross-disciplinary teammates from business schools and other polytechnics to tackle *SDG-focused* challenges.
- Applied problem-solving and innovation to develop a viable solution during the hackathon.
- Achieved Top 8 finalist placement, gaining hands-on experience in teamwork and rapid prototyping.

SP SEED Programming Competitions

Apr 2023

- Participated in *Capture-The-Flag* and competitive programming challenges, enhancing skills in debugging, reverse

Reference upon request

engineering, algorithms, and code analysis under time constraints.

EnergizED Hackathon 2025

Nov 2025

- Finalist in a polytechnic-wide hackathon focused on AI-driven solutions for sustainable nutrition
- Addressed the challenge: “How might we automatically track users’ daily caloric intake using AI to make healthy living effortless and sustainable?”
- Played a key role in designing and ideating an AI-powered dietary management concept that integrates automated calorie tracking, intelligent meal planning, and grocery recommendations to promote healthier and more sustainable food choices

Certificates & Self-Learning

AWS Certified Cloud Practitioner

May 2026

- Gain a high-level knowledge of widely used tools and services within the AWS cloud.

Python PCEP

Ongoing

- Entry-level Python Programming with pathways leading to automation, scripting, machine learning and AI.

CORE COMPETENCIES

Languages	: Java, JavaScript, Python, CSS, HTML,SQL.
Libraries & Frameworks	: Express, Bootstrap, React.js, Spring Boot, Tailwind CSS, Futtter, Framer Motion.
Tools / Platforms	: Microsoft Power Platform, Mendix, Automated Deployment, AWS, Azure, Figma, GitHub, Node.js, UiPath, Render, Vite.
Databases	: MySQL, Neon DB, PostgreSQL.
Methodologies & Concepts	: Agile, IoT, RESTful API, SDLC.
Testing	: Automated Testing, Playwright.

SOCIETIES

Member of SG Youth-In-Technology Community

Apr 2024 - Apr 2026

- Actively participate in monthly AI discussions and project showcases to deepen understanding of current advancements and exchange insights with peers in the field.

Member of SP SEED Student Interest Group

Apr 2024 - Apr 2026

- Regularly engage in how-to workshops and tutorials led by seniors and alumni and actively participate in *Capture-The-Flag* and other community-based tech competitions.

Member of SP Life Savers

Apr 2023 - Mar 2025

- Trained in water-based life-saving techniques, including rescue procedures and emergency response protocols.
